Keeping Your Ceiling Tiles Clean Has Never Been Easier

Now, with AirTech Ceiling Tile Protectors, airborne dirt flows away from your ceiling tiles eliminating the need for costly cleaning and replacing.

The Problem to Solve

Most public facilities fail to address the common problem of the accumulation of soils and other particles in the air ducts of their HVAC systems. Re-circulating air leaves these systems via ceiling-mounted diffusers and deposits soil on the surrounding ceiling tiles, thus producing an unsightly appearance. (See Figure 1)

The Solution

The AirTech Ceiling Tile Protector (CTP) is an easy, cost effective way to eliminate this problem forever! Once in place, this nearly invisible, easy to install product prevents dust and dirt build-up by slightly altering the pattern of air flow thus leaving your ceiling like new. (See Figure 2)

AirTech Benefits

- **Fast and easy installation****
- **Clear and nearly invisible****
- **Reduces ceiling maintenance costs****
- **National Sanitation Foundation (NSF) tested****
- **Fits all standard diffusers (24" X 24" and 12" X 24")****
